## Qualità e reputazione

Chiamiamo **qualità** la misura in cui i prodotti soddisfano le aspettative del cliente, garantendo delle performance superiori alle prerogative dettate dalla normativa.

Chiamiamo **reputazione** l'esperienza complessiva del cliente: inizia con la consulenza per il corretto dimensionamento dell'impianto e termina con l'assistenza post vendita.

## Quality and reputation

We call **quality** the extent to which products meet customer expectations by guaranteeing performance that exceeds the prerogatives dictated by regulations.

We call **reputation** the overall customer experience: it starts with advice on proper plant sizing and ends with after-sales service.

## Qualité et réputation

Nous appelons **qualité** la mesure dans laquelle les produits répondent aux attentes du client en dépassant les normes.

Nous appelons **réputation** l'expérience globale du client: elle commence par des conseils sur le dimensionnement correct du système et se termine par le service après-vente.

# Tecnologia e pensiero

La **tecnologia** è un sistema necessario a velocizzare, ottimizzare e verificare i processi produttivi in azienda.

Ma è anche uno stile e una forma di **pensiero**, e un metodo per essere sempre al passo con i tempi.

## Technology and thinking

**Technology** is a necessary system to speed up, optimise and control production processes in a company.

But it is also a style and a way of **thinking**; a method of keeping up with the times.

## Technologie et pensée

La **technologie** est un système nécessaire pour accélérer, optimiser et contrôler les processus de production dans une entreprise.

Mais c'est aussi un style et une façon de **penser**, une méthode pour rester dans l'air du temps.

## Artigianalità e industria

L'industria vive di efficienza e velocità di produzione. L'artigiano vive dell'importanza della perfezione e del dettaglio.

Ecco perché integriamo l'arte dell'**artigianalità** con l'efficacia di un evoluto e completo processo **industriale**.

## Artisanship and industry

Industry lives by efficiency and speed of production. The craftsman lives by the importance of perfection and detail.

That's why we integrate the art of **craftsmanship** with the efficiency of an advanced and complete **industrial** process.

## Les artisans et l'industrie

L'industrie se nourrit d'efficacité et de rapidité de production. L'artisan vit de l'importance de la perfection et du détail.

C'est pourquoi nous intégrons l'art de l'**artisanat** à l'efficacité d'un processus **industriel** avancé et complet.

## LA NOSTRA STORIA

OUR HISTORY | NOTRE HISTOIRE

1997

**Apros è la prima azienda italiana a produrre canali da fumo per stufe a legna.**

**EN** Apros is the first Italian company to manufacture connecting flue systems for wood stoves.

**FR** Apros est la première société italienne à produire des tuyaux de raccordement pour poêles à bois.

2001

**Primi in Italia a produrre canali da fumo per legna e pellet.**

**EN** The first ones in Italy to manufacture connecting flue systems for wood and pellet.

**FR** Les premiers en Italie à produire des tuyaux de raccordement pour bois et pellet.

2007

**Nuovo stabilimento Apros. 4000 m<sup>2</sup> di superficie tecnologicamente all'avanguardia.**

**EN** New Apros factory. 4000 m<sup>2</sup> of technologically cutting edge area.

**FR** Nouveau établissement Apros. 4000 m<sup>2</sup> de surface technologiquement de pointe.

2009

**2 milioni e mezzo di € investiti per installare la nuova linea automatizzata e ampliare la produzione con canne fumarie mono e doppia parete.**

**EN** 2 million and a half € invested to install the new automated line and to expand the production with single and double wall chimney systems.

**FR** 2 millions et demi € ont été investis pour installer la nouvelle ligne automatisée et étendre la production aux conduits de cheminées simple et double paroi.

2024

**Il Gruppo Sphering, di cui Apros fa parte, debutta sul mercato italiano a Progetto Fuoco 2024, con lo stand più imponente del padiglione. Il tour di Apros continua nelle città italiane, focalizzato sull'assistenza dedicata alle esigenze dei clienti e sulla presentazione delle ultime novità. La filosofia di Apros è: ci prendiamo cura di voi.**

**EN** The Sphering Group, of which Apros is part, debuts on the Italian market at Progetto Fuoco 2024 with the most impressive stand in the hall. The Apros Tour continues in Italian cities, focused on the assistance dedicated to the needs of customers and the presentation of the latest news. Apros philosophy: we take care of you.

**FR** Le Groupe Sphering, dont Apros fait partie, fait ses débuts sur le marché italien à Progetto Fuoco 2024 avec le stand le plus imposant du pavillon. Le Tour d'Apros continue dans les villes italiennes, axé sur l'assistance dédiée aux besoins des clients et sur la présentation des dernières nouveautés. La philosophie d'Apros: nous prenons soin de vous.

2022

**Apros festeggia 25 anni di attività. Un traguardo di cui essere orgogliosi e che rappresenta solo l'inizio di un lungo viaggio.**

**EN** Apros celebrates 25 years in business. A milestone to be proud of and just the beginning of a long journey.

**FR** Apros fête ses 25 ans d'existence. Une étape dont nous pouvons être fiers et qui n'est que le début d'un long voyage.

2020

**Il logo Apros cambia stile: nasce Sphering Group, evoluzione aziendale del Group Joncoux, gruppo leader in Europa con 100 anni di storia alle spalle. Il nuovo gruppo europeo è composto da aziende del calibro di Joncoux, Eurotip, Lorflex, MK, Apros, Sfl e Eka.**

**EN** The Apros logo changes its style: Sphering Group is born, the corporate evolution of the Joncoux Group, a leading group in Europe with 100 years of history. Some very high profile companies such as Joncoux, Eurotip, Lorflex, MK, Apros, Sfl and Eka team up to build this new group.

**FR** Le logo Apros change de style: la naissance d'une nouvelle identité, celle de Sphering Group, le nouveau nom du Groupe Joncoux. 100 ans d'histoire pour ce Groupe Européen de premier plan. Un groupe construit autour de solides entreprises telles que Joncoux, Eurotip, Lorflex, MK, Apros, Sfl e Eka.

2015

**Apros raddoppia la superficie produttiva. 8000 m<sup>2</sup> con la produzione anche dei canali da fumo smaltati.**

**EN** Apros doubles its own manufacturing area. 8000 m<sup>2</sup> with the production also of enamelled connecting flue systems.

**FR** Apros double la surface de production. 8000 m<sup>2</sup> avec aussi la fabrication des tuyaux de raccordement émaillés.

2014

**Acquisizione da parte del Group Joncoux. Apros diventa un'azienda internazionale.**

**EN** Acquisition by the Group Joncoux. Apros becomes an international company.

**FR** Acquisition par le Groupe Joncoux. Apros devient une société internationale.

## UN'AZIENDA ITALIANA CON UNO SLANCIO EUROPEO

Nata nel 1997 in provincia di Padova, **Apros** è la prima azienda in Italia nel settore della fumisteria. Oggi l'azienda produce oltre un **milione** e mezzo di pezzi l'anno, grazie alla collaborazione di oltre 50 dipendenti.

La gamma prodotti, che soddisfa diversi settori, è estremamente vasta: canali da fumo e canne fumarie mono, doppia e tripla parete sia in acciaio INOX sia in plastica; ma anche passaggi per tetti in legno e molto altro. Apros, da oltre vent'anni, conquista il mercato interno ed estero puntando su Made in Italy, design ed eleganza dei propri prodotti, senza rinunciare alle elevate performance e alla sicurezza.

### **APROS: an Italian company with an european aspiration**

Founded in 1997 in the province of Padua, **Apros** is a leading company in Italy in the flue pipes and chimney industry. Today the company is producing over a **million** and a half pieces a year, thanks to the work of over 50 employees.

The product range, designed to satisfy different sectors, is extremely wide: single, double and triple wall flue ducts and chimneys made of steel, stainless steel and plastic, passages for wooden roofs and much more. For over twenty years, Apros has conquered the domestic and foreign market by focusing on Made in Italy, design and elegance of its products, without sacrificing high performance and safety.

### **APROS: une entreprise italienne avec un élan européen**

**Apros**, fondée en 1997 dans la province de Padoue, est une entreprise leader en Italie dans la production des conduits de fumée et des cheminées. Aujourd'hui, l'entreprise produit plus d'un **million** et demi de pièces par an grâce au travail de plus de 50 employés.

La gamme de produits, conçue pour satisfaire différents secteurs, est extrêmement large: conduits de cheminée en simple, double et triple paroi et cheminées en acier, acier inox et plastique, passages pour toitures en bois et bien plus encore. Depuis plus de vingt ans, Apros a conquis le marché national et étranger en se concentrant sur le Made in Italy, le design et l'élégance de ses produits, sans sacrifier la haute performance et la sécurité.

## RICERCA E SVILUPPO: LE CHIAVI PER PROGETTARE IL FUTURO

Qualità del prodotto e facilità d'installazione: ecco perché **ogni anno investiamo il 15% del nostro fatturato per migliorarci.**

Quando produciamo le nostre canne fumarie pensiamo, oltre alla qualità del prodotto, a chi dovrà installarle. Per questo abbiamo studiato un sistema unico che rende il montaggio semplice e rapido. Nel 2009 abbiamo introdotto una linea di produzione completamente automatizzata, che ci consente di passare direttamente dalla lamiera al tubo finito. Ogni processo successivo, come stampaggio, taglio e saldatura, è stato studiato per garantire la perfezione assoluta. Sono un esempio le nostre saldature, eseguite a regola d'arte e controllate una per una, o l'automazione per l'inserimento della lana di roccia nei tubi a doppia parete, che garantisce una distribuzione perfetta del materiale isolante su tutta la superficie.

### Research and development: the keys to designing the future

Quality of the product and ease of installation. That's why **every year we invest 15% of our turnover to improve.**

When we manufacture our chimney systems, we think about the quality of the product, but also about the people who will have to install it. For this reason we have studied a unique system that makes installation simple and quick. In our production we have introduced, in 2009, a fully automated line, which allows us to go directly from the metal sheet to the finished pipe. Each following process, such as molding, cutting and welding, is studied to ensure absolute perfection. Our welding represents an example, that is performed in a perfect-made way and checked one by one, or the automation for the insertion of the rock wool in the double wall pipes, which ensures a perfect distribution of the insulating material over the entire surface.

### La recherche et le développement: les clés pour concevoir l'avenir

Qualité du produit et facilité d'installation. Voilà pourquoi nous investissons **chaque année 15% de notre chiffre d'affaires pour nous améliorer.**

Quand nous produisons nos conduits de cheminées nous ne pensons pas seulement à la qualité du produit, mais aussi aux personnes qui les installeront. Pour cela, nous avons conçu un système unique qui permet une installation simple et rapide. Dans notre production, nous avons introduit en 2009 une ligne entièrement automatisée, qui nous permet de passer directement de la tôle au tuyau fini. Chaque processus, tels que le moulage, la coupe et la soudure, ont été conçus pour assurer la perfection absolue. Nos soudures représentent un exemple, réalisées de façon professionnelle et contrôlées une par une, ou l'automatisation pour l'insertion de la laine de roche entre les tubes à double paroi, ce qui assure une parfaite répartition de l'isolant sur toute la surface.

Flue & Air Care  
Since 1919

## SU DI NOI

Sphering è il principale attore industriale dei canali da fumo in Europa.

Con più di 1.000 dipendenti consolidati in Europa, Sphering è un market maker europeo riconosciuto per la sua esperienza nella concezione, produzione e distribuzione di sistemi fumari e di ventilazione di alto livello.

### EN ABOUT US

Sphering is the leading industrial player in flue and chimney systems in Europe.

With +1000 experienced people across Europe, Sphering is an EU market maker with expertise in design, manufacturing and distribution of advanced air and flue care systems.

### FR À PROPOS DE NOUS

Sphering est le principal acteur industriel des conduits de fumée en Europe.

Avec plus de 1000 collaborateurs expérimentés à travers l'Europe, Sphering est un market maker européen reconnu pour son expertise dans la conception, la fabrication et la distribution de systèmes de cheminée et de ventilation hauts de gamme.

Canali da fumo in acciaio alluminato.

Connecting flue pipes made of aluminized steel.

Tuyaux de raccordement en acier aluminisé.

### PLUS e CARATTERISTICHE TECNICHE:

- struttura robusta, spessore 1,2 mm
- verniciatura siliconica liquida antigraffio
- temperatura massima d'esercizio 200°C con l'utilizzo di guarnizioni in silicone (in dotazione), 250°C con l'utilizzo di guarnizioni in Viton (su richiesta) oppure 300°C senza guarnizione

### PLUS and TECHNICAL CHARACTERISTICS:

- robust structure, 1,2 mm thickness
- scratchproof liquid silicone paint
- working temperature up to 200°C with silicone gasket (included), 250°C with Viton gaskets (on request) or 300°C without gasket

### AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:

- structure robuste, épaisseur 1,2 mm
- peinture silicone liquide anti-rayures
- température de travail jusqu'à 200°C avec joint en silicone (inclus), 250°C avec joint en Viton (sur demande) ou 300°C sans joint

# Wall G Zero

Wall G Zero

Raccordo universale per pareti in materiali infiammabili costruito in acciaio inox AISI 316L e materiali coibentanti ad altissime prestazioni che assicurano la protezione delle pareti isolandole dalle alte temperature. Il passaggio a parete è completo di due rosoni: un rosone fisso nella parte esposta all'esterno dell'edificio e un rosone a finitura da installare sul lato interno della parete da attraversare.

### PLUS

- certificato G ZERO = 0 mm dalla parete sensibile
- sicuro su qualsiasi tipo di materiale infiammabile (legno, eps, poliuretano, etc)
- semplice e veloce da installare
- completamente inglobato nella parete
- le sue dimensioni esterne sono contenute, permettendo così di effettuare un foro molto ridotto sulla parete
- è realizzato su misura, in base alla parete da attraversare

Universal pipe fitting for walls in flammable materials made of AISI 316L stainless steel and high performance insulation materials that ensure the protection of the walls by insulating them from high temperatures. The wall passage is complete with two rings: a fixed ring in the exposed part outside the building and a finishing ring to be installed on the inside of the wall to be crossed.

### PLUS

- G ZERO certified = 0 mm from the sensitive wall
- safe on any type of flammable material (wood, eps, polyurethane, etc.)
- easy and quick to install
- completely incorporated in the wall
- small dimension, thus allowing to make a very small hole in the wall
- made to measure, according to the wall to be crossed

Raccord universel pour murs en matériaux inflammables construit en acier inox AISI 316L et matériaux isolants à hautes performances qui assurent la protection des parois en les isolant des hautes températures. Le passage mural est complété par deux rosaces : une rosace fixe dans la partie exposée à l'extérieur du bâtiment et une rosace de finition à installer sur le côté intérieur du mur à traverser.

### PLUS

- certifié G ZERO = 0 mm de la paroi sensible
- sûr sur tout type de matière inflammable (bois, eps, polyuréthane, etc.)
- simple et rapide à installer
- entièrement englobé dans la paroi
- petites dimensions, permettant ainsi de faire un trou sur le mur très réduit
- fait sur mesure, selon le mur à traverser

Ø1: indiquer le diamètre souhaité du tuyau intérieur

## Istruzioni di montaggio

Assembly instructions

Instructions de montage

Sulla parete da attraversare, effettuare un foro passante del diametro esterno del passaggio parete, come da tabella dimensionale. Al termine pulire il foro dai residui di taglio.

On the wall to be crossed, make a through hole of the outer diameter of the wall passage. See dimensional table below. When finished, clean the hole of cutting residues.

Sur le mur à traverser, faites un trou traversant du diamètre extérieur du passage mural, comme indiqué dans le tableau des dimensions ci-dessous. À la fin, nettoyez le trou des résidus de coupe.

Dall'esterno dell'edificio, verso l'interno, introdurre il passaggio parete nel foro effettuato: si deve aver cura di tenere il rosone fisso a filo parete mentre, dall'altra estremità (interno edificio), si va a fissare il rosone mobile. Il rosone mobile va fissato aggiungendo la guarnizione in fibra in dotazione a mezzo di viti (non incluse).

From the outside of the building to the inside, introduce the wall passage into the hole made: keep the rose fixed flush with the wall while, at the other end (inside the building), fix the movable ring.

The movable ring must be fixed by adding the supplied fiber gasket by screws (not included).

De l'extérieur du bâtiment, vers l'intérieur, introduire le passage mural dans le trou effectué : tenez la rosace fixée à fil mural tandis que, de l'autre extrémité (intérieur du bâtiment), fixez la rosace mobile.

La rosace mobile doit être fixée en ajoutant le joint en fibre fourni au moyen de vis (non incluses).

Per rendere impermeabile il foro passante provvedere a siliconare il rosone esterno contro la parete con normale silicone idrorepellente (non fornito).

To make the through hole waterproof, use normal water-repellent silicone (not included) on the outer ring against the wall.

Pour rendre le trou traversant imperméable, silicomez la rosace extérieure contre la paroi avec du silicone hydrofuge ordinaire (non fourni).

Per l'evacuazione dei fumi a tetto, collegare sulla parte esterna il condotto camino linea Dynamic Two.

Sulla parte interna il passaggio parete è predisposto per essere collegato direttamente alla linea Dynamic Two e a tutti i canali da fumo (linee Dynamic One, Linee Legna, Linee Pellet ) utilizzando gli appositi adattatori.

On the outside, connect the Dynamic Two line to lead out the fireplace smoke. On the inside, the wall passage is designed to be connected directly to the Dynamic Two line and to all the connecting flue pipes (Dynamic One, Linea Legna, Linea Pellet) using the appropriate adaptors.

Pour l'évacuation des fumées sur le toit, connectez sur l'extérieur le système de cheminée de la ligne Dynamic Two.

Sur la partie interne, le passage mural est prévu pour être connecté directement à la ligne Dynamic Two et à tous les tuyaux de raccordement (Dynamic One, Linea Legna, Linea Pellet) en utilisant les adaptateurs appropriés.

Procedere con le normali operazioni di installazione delle parti del camino e del canale da fumo come solitamente previsto dalle norme di installazione.

Proceed with installation of the chimney and connecting flue pipe in strict compliance with safety standards and current regulation.

Procédez aux opérations normales d'installation des parties de la cheminée et du tuyau de raccordement conformément aux règles d'installation.

# Unix G Zero

Raccordo universale per tetti in legno composto da:

- parete interna in acciaio inox AISI 316L
- parete intermedia ed esterna in acciaio inox AISI 304 BA
- fibra coibentante di ultimissima generazione: altissima resistenza alle alte temperature, idrorepellente e duratura nel tempo
- è dotato di un rosone superiore basculante completo di materassino di protezione in fibra Biotex e di un rosone inferiore

### PLUS

- certificato G ZERO = 0 mm dalla parete sensibile
- semplice e veloce da installare grazie al sistema di regolazione dell'altezza e dell'inclinazione da 0° a 45°, eliminando così la necessità di sopralluoghi preliminari
- il rosone inferiore è ermetico quindi lo rende idoneo all'installazione nelle case passive
- le sue dimensioni esterne sono contenute, permettendo così di effettuare un foro sul tetto molto ridotto

Universal pipe fitting for wooden roofs consisting of:

- internal wall in AISI 316L stainless steel
- intermediate and external wall in AISI 304 BA stainless steel
- latest generation insulating fiber: very high resistance to high temperatures, water repellent and long lasting
- equipped with an upper orientable ring with a protective mat in Biotex fiber and a lower ring

### PLUS

- G ZERO certified = 0 mm from the sensitive wall
- simple and quick to install thanks to the height and inclination adjustment system from 0° to 45°, thus eliminating the need for preliminary inspections
- the lower ring is hermetic therefore making it suitable for installation in passive houses
- small dimensions, thus allowing to make a very small hole in the roof

Raccord universel pour toitures en bois composé de:

- paroi interne en acier inoxydable AISI 316L
- paroi intermédiaire et extérieure en acier inoxydable AISI 304 BA
- fibre isolante de dernière génération: très haute résistance aux hautes températures, imperméable et de longue durée
- équipé d'une rosace supérieure orientable avec un tapis de protection en fibre Biotex et d'une rosace inférieure

### PLUS

- certifié G ZERO = 0 mm de la paroi sensible
- installation simple et rapide grâce au système de réglage de la hauteur et de l'inclinaison de 0° à 45°, éliminant ainsi le besoin d'inspections préalables
- la rosace inférieure est hermétique, ce qui le rend adapté à une installation dans des maisons passives
- petites dimensions, permettant ainsi de faire un tout petit trou dans le toit

# Unix

Raccordo universale per tetti in legno composto da:

- parete interna in acciaio inox AISI 316L
- parete intermedia ed esterna in acciaio inox AISI 304 BA
- triplo isolamento formato nella parte più interna da un'intercapedine d'aria di circa 5 mm, coppella in lana di roccia di 50 mm, ulteriore intercapedine d'aria di circa 20 mm
- è dotato di un rosone superiore basculante completo di materassino di protezione in fibra Biotex e di un rosone inferiore

#### PLUS

- certificato G20 = 20 mm dalla parete sensibile
- permette un montaggio rapido su tetti con inclinazione da 0° a 30° (per inclinazioni maggiori, kit rosone su richiesta)
- le sue dimensioni esterne sono contenute, permettendo così di effettuare un foro sul tetto molto ridotto
- protegge i tetti in legno e li isola dalle alte temperature

Universal pipe fitting for wooden roofs consisting of:

- internal wall in AISI 316L stainless steel
- intermediate and external wall in AISI 304 BA stainless steel
- triple insulation made by an air gap of about 5 mm, rock wool cup of 50 mm, and an additional air gap of about 20 mm
- equipped with an upper orientable ring with a protective mat in Biotex fiber and a lower ring

#### PLUS

- G20 certified = 20 mm from the sensitive wall
- allows quick assembly on roofs with an inclination from 0° to 30° (for greater inclinations, ring kit on request)
- small dimensions, thus allowing to make a very small hole in the roof
- protects wooden roofs and insulates them from high temperatures

Raccord universel pour toitures en bois composé de :

- paroi interne en acier inoxydable AISI 316L
- paroi intermédiaire et extérieure en acier inoxydable AISI 304 BA
- triple isolation formée dans la partie la plus interne par une lame d'air d'environ 5 mm, coupelle en laine de roche de 50 mm, lame d'air supplémentaire d'environ 20 mm
- équipé d'une rosace supérieure orientable avec un tapis de protection en fibre Biotex et d'une rosace inférieure

#### PLUS

- certifié G20 = 20 mm de la paroi sensible
- permet un montage rapide sur des toitures avec une inclinaison de 0° à 30° (pour des inclinaisons plus importantes, kit spécifique sur demande)
- ses dimensions extérieures sont contenues, permettant ainsi de faire un tout petit trou dans le toit
- protège les toitures en bois et les isole des hautes températures

Canali da fumo e condotti per uso interno in acciaio inox AISI 316L.

Connecting flue pipes for indoor, made of stainless steel AISI 316L.

Tuyaux de raccordement pour utilisation intérieure en acier inox AISI 316L.

### PLUS e CARATTERISTICHE TECNICHE:

- sono adatti come canali da fumo o per intubamento o risanamento di cavedi e vani tecnici esistenti
- spessore 0,5 mm
- temperatura massima d'esercizio 200°C con l'utilizzo di guarnizioni in silicone (fornite in dotazione fino al diam.120 incluso)
- testata G, resistente all'incendio di fuliggine a 1000°C

### PLUS and TECHNICAL CHARACTERISTICS:

- they are suitable as connecting flue pipes and for ducting or renovating existing chimneys and technical compartments
- thickness 0.5 mm
- working temperature up to 200°C with the use of silicone gaskets (supplied up to diam.120 included)
- tested G, resistant to soot fire at 1000°C

### AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:

- ils sont aptés comme tuyaux de raccordement, au gainage ou à la rénovation de cheminées ou compartiments techniques existants
- épaisseur 0,5 mm
- température de travail jusqu'à 200°C avec l'utilisation de joints silicone (fournis jusqu'au diam. 120 inclus)
- testé G, résistant au feu de suie à 1000°C

T200-P1-W-V2-L50050-O70 con elastomero/with gasket/avec joint

#### Caratteristiche tecniche della coppella

- Designazione di sistema: T450-N1-W-V2-L50050-G90 (test con cavedio tecnico in aria libera)
- Diametri disponibili: dall'80 al 300 mm
- Lunghezza: 1000 mm
- Spessore: 13 mm
- Resistenza allo shock termico: G90 (90 millimetri di distanza da parete sensibile)
- Classe di temperatura: T450
- Temperatura di regime costante: 550°C
- Temperatura di punta: 1000°C
- Reazione al fuoco: A1
- Resistente alle vibrazioni
- Non subisce alterazioni in caso di formazione di condensa, è idrorepellente.
- Buona funzione di isolamento acustico

#### Technical features:

- System designation: T450-N1-W-V2-L50050-G90 (test on existing chimney with ventilation)
- Available diameters: from 80 to 300 mm
- Length: 1000 mm
- Thickness: 13 mm
- Thermal shock resistance: G90 (distance of 90mm from sensitive wall)
- Temperature class: T450
- Constant operating temperature: 550°C
- Peak temperature: 1000°C
- Reaction to fire: A1
- Vibration resistant
- It does not undergo alterations in case of condensation, it is water-repellent.
- Good sound insulation

#### Caractéristiques techniques:

- Désignation du système: T450-N1-W-V2-L50050-G90 (testé dans un conduit de cheminée existant avec ventilation haute et basse)
- Diamètres disponibles: de 80 à 300 mm
- Longueur: 1000 mm
- Epaisseur: 13 mm
- Résistance aux chocs thermiques: G90 (distance de 90mm de la paroi inflammable)
- Classe de température: T450
- Température en fonctionnement constant: 550°C
- Température de pointe: 1000°C
- Classe de réaction au feu: A1
- Résistant aux vibrations
- Il ne subit pas d'altérations en cas de formation de condensats, il est hydrofuge.
- Bonne fonction d'isolation acoustique

# Dynamic TWO

Canna fumaria in doppia parete coibentata per uso esterno.

Double wall insulated chimney system for outdoor.

Système de cheminée isolée à double paroi pour l'extérieur.

### PLUS e CARATTERISTICHE TECNICHE:

- parete interna in acciaio inox AISI 316L spessore 0,5 mm
- parete esterna in acciaio inox AISI 304BA spessore 0,5 mm e per finiture verniciate in acciaio zincato spessore 0,5 mm
- coibentazione con lana di roccia insufflata spessore 25 mm e densità 180 kg/m<sup>3</sup>
- speciali anelli in acciaio inox per il contenimento dell'isolante
- temperatura massima d'esercizio 200°C con l'utilizzo di guarnizioni in silicone (su richiesta) o 600°C senza elastomero

### PLUS and TECHNICAL CHARACTERISTICS:

- internal wall in stainless steel AISI 316L thickness 0.5 mm
- outer wall in stainless steel AISI 304BA thickness 0.5 mm and for painted finishes in galvanized steel thickness 0.5 mm
- insulation with 25 mm thick rock wool blown between the walls at 180 kg / m<sup>3</sup> density
- special stainless steel rings to contain the insulation
- working temperature up to 200°C with the use of silicone gaskets (on request) or 600°C without gasket

### AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:

- paroi interne en acier inoxydable AISI 316L épaisseur 0,5 mm
- paroi extérieure en acier inox AISI 304BA épaisseur 0,5 mm et pour les finitions peintes en acier galvanisé épaisseur 0,5 mm
- isolation avec de la laine de roche de 25 mm d'épaisseur soufflée entre les parois à une densité de 180 kg/m<sup>3</sup>
- anneaux spéciaux en acier inoxydable pour contenir l'isolant
- température de travail jusqu'à 200°C avec l'utilisation de joints en silicone (sur demande) ou 600°C sans joint

### RTIR

#### Regolatore di tiraggio automatico

Automatic air draught regulator - Régulateur de tirage automatique

Finiture disponibili - Available finishes - Finitions disponibles

F.08 - INOX SS - INOX	Ø	
I100RTIR	100	1
I130RTIR	130	1
I150RTIR	150	1
I180RTIR	180	1

Serve per stabilizzare e regolare il tiraggio della canna fumaria attraverso l'immissione di aria dall'ambiente d'installazione o dall'esterno, conforme d-legs. 152/06, UNI 7129, UNI EN1443, UNI 10683 ecc. I regolatori di tiraggio sono utilizzabili anche come apertura automatica della ventilazione 3 Pa.

It is useful to stabilize and adjust the draft of the chimney through the release of air from the installation environment or from outside, in accordance with d-legs. 152/06, UNI 7129, UNI EN1443, UNI 10683 etc. The draught regulators are also used as automatic opening of ventilation 3 Pa.

Il sert à stabiliser et à régler le tirage du conduit de fumée, par l'introduction d'air de l'ambiance d'installation ou de l'externe, en conformité avec le d-legs. 152/06, UNI 7129, UNI EN1443, UNI 10683 etc. Les régulateurs de tirage sont également utilisés comme ouverture automatique de la ventilation 3 Pa.

Da applicare su RACT e T90F ridotto con stacco a scelta  
To apply on RACT and T90F reduced with coupler to be chosen  
A appliquer à RACT et T90F réduit avec débouchure à choisir

## SUPS

SUPS è un supporto a solaio costruito per l'installazione di canne fumarie.

SUPS is a floor support that is destined for the installation of chimneys.

SUPS est un support au plancher construit pour l'installation des cheminées.

### CARATTERISTICHE TECNICHE

- Sistema solido e veloce
- La fascetta di acciaio consente di sostenere la canna fumaria impedendo che gli elementi si sgancino tra di loro

### TECHNICAL FEATURES

- It is a solid and fast system
- The clamp in steel allows to support the flue chimney, preventing elements to unhook between them

### CARACTÉRISTIQUES TECHNIQUES

- Il est un système solide et rapide
- Le collier en acier apporte un soutien à la cheminée, en empêchant que les éléments se décrochent entre eux

### UTILIZZO

- In caso di solai in cemento, consente di fissare la canna fumaria ad un'altezza definita dall'installatore.
- Per installarlo è sufficiente eseguire un foro nel solaio, fissarlo con sei semplici viti ed infine far passare l'elemento lineare, bloccandolo all'altezza utile, mediante una chiave esagonale.

### USAGE

- In case of floor in concrete, it allows to fix the chimney to a height defined by the installer
- To install it simply drill a hole in the floor, fix the element with six simple screws and finally pass the linear element, blocking it at the suitable height by a hexagonal spanner.

### USAGE

- En cas de plancher en béton, il permet de fixer la cheminée à une hauteur définie par l'installateur
- Pour l'installer il suffit de percer un trou dans le plancher, le fixer par six vis simples, et puis faire passer l'élément linéaire, en le bloquant à la hauteur convenable, par une clé hexagonale.

## FORXS - FORX2

FORX e FORX2 sono delle fascette complete di ali di fissaggio e supporto, regolabili in inclinazione da 0° a 45°.

FORX and FORX2 are clamps with fixing and support wings, adjustable in inclination from 0° to 45°. These clamps bind the chimney that crosses the roof in a vertical condition.

FORX et FORX2 sont des brides avec des ailes de fixation et support, ajustables en inclination de 0° à 45°. Ces brides immobilisent la cheminée qui traverse le plancher en condition verticale.

Queste fascette vincolano la canna fumaria che attraversa il solaio in condizione verticale. Sono leggere ma allo stesso tempo robuste grazie alla solidità della piegatura presente sulle ali. Sono poco ingombranti, adatte ad essere installate su tetti e solai.

They are light but at the same time robust thanks to the solidity of the wings bending. They are not very bulky, and they are apt to be installed on roofs and floors.

Elles sont légères mais au même temps robustes grâce à la solidité du pliage présent sur les ailes. Elles ne sont pas très encombrantes, aptes pour être installées sur les toits et les planchers.

## FIRE STOP

Sistema composto da due solide piastre in acciaio zincato

### CARATTERISTICHE TECNICHE

- Designazione tecnica T450-N1-D-V2-L50050-G(50)
- Il prodotto è stato sottoposto ai test termici di temperatura e ai test di resistenza al fuoco secondo la normativa europea BS EN 1856-1:2009 & BS 476: PART 20:1987
- Ha lo scopo di prevenire contatti di calore diretti mantenendo la canna fumaria concentrica rispetto al cavedio
- Le piastre possono essere areate ossia provviste di fessure e fori per il passaggio dell'aria, oppure non areate

### UTILIZZO

- Secondo le regolamentazioni britanniche in materia di edilizia, quando una canna fumaria attraversa un piano o un soffitto, l'installazione deve essere completata da un FIRE STOP realizzato in materiale non combustibile
- Le piastre areate sono utilizzate per interni e in caso di vicinanza a materiali sensibili al calore
- Le piastre non areate sono utilizzate per chiudere camini in refrattario.

System composed of two solid plates made of galvanized steel.

### TECHNICAL FEATURES

- Technical classification T450-N1-D-V2-L50050-G(50)
- The product was subjected to thermal testing temperature and fire resistance tests, according to European Standard BS EN 1856-1:2009 & BS 476: PART 20:1987.
- It is designed to prevent direct contact to heat, maintaining the chimney vertical in their existing masonry chimney.
- The plates can be ventilated, or better provided with slots and holes for the passage of air, or non-ventilated.

### USE

- According to British regulations on construction, when a chimney passes through a floor or ceiling, the installation must be completed by a Fire Stop made of non-combustible material.
- The ventilated plates are used for indoor and proximity to heat sensitive material.
- The non-ventilated plates are used to close fire-resistant chimneys.

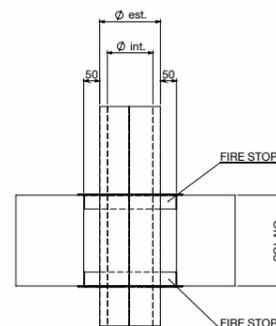

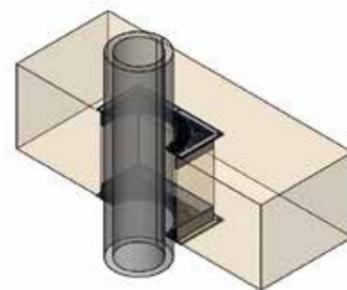

Système composé par deux plaques solides en acier galvanisé.

### CARACTÉRISTIQUES TECHNIQUES

- Désignation technique T450-N1-D-V2-L50050-G(50)
- Le produit a été soumis aux essais thermiques de température et aux tests de résistance au feu, selon la norme européenne BS EN 1856-1:2009 & BS 476: PART 20:1987.
- Il est conçu pour empêcher les contacts directs à la chaleur, en maintenant le conduit de cheminée tout droit par rapport au boisseau.
- Les plaques peuvent être ventilées, ou mieux pourvues de fentes et de trous pour le passage de l'air, ou non ventilées.

### UTILISATION

- Selon la réglementation britannique sur la construction, où une cheminée traverse un plancher ou un plafond, l'installation doit être complétée par la Plaque d'écart au feu faite d'un matériau incombustible.
- Les plaques ventilées sont utilisées pour l'intérieur et en proximité de matériaux thermosensibles.
- Les plaques non ventilées sont utilisées pour fermer les cheminées réfractaires.

# Smart TWO 10

Smart TWO 10

Canna fumaria in doppia parete coibentata per uso esterno.

Double-wall insulated flue for outdoor use.

Conduit isolé à double paroi pour usage extérieur.

### PLUS e CARATTERISTICHE TECNICHE:

- le dimensioni contenute lo rendono adatto anche per l'intubamento di cavedi e vani tecnici
- minore impatto visivo in facciata d'edificio
- parete interna in acciaio inox AISI 316L spessore 0,5 mm
- coibentazione con lana di roccia spessore 10 mm, densità 90 kg/m<sup>3</sup>
- temperatura massima di esercizio 200°C con l'utilizzo di guarnizioni in silicone (su richiesta) o 600°C senza elastomero

### PLUS and TECHNICAL CHARACTERISTICS:

- the compact size makes it also suitable for ducting in shafts and technical compartments
- less visual impact on the building facade
- internal wall in AISI 316L stainless steel, thickness of 0.5 mm
- insulation with rock wool, thickness 10 mm, density 90 kg/m<sup>3</sup>
- working temperature up to 200°C with silicone gaskets (included) or 600°C without gasket

### AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:

- les petites dimensions le rendent également adapté à la canalisation des puits et des compartiments techniques
- moins d'impact visuel sur la façade du bâtiment
- paroi interne en acier inoxydable AISI 316L épaisseur 0,5 mm
- isolation avec laine de roche épaisseur 10 mm, densité 90 kg/m<sup>3</sup>
- température de travail jusqu'à 200°C avec joint en silicone (inclus) ou 600°C sans joint

No. 0432-CPR-00095-320

TRIO

Sistema camino coassiale in tripla parete in acciaio inox, isolato.

La tubazione interna e la tubazione esterna formano due vie di flusso:

- nella via centrale vengono espulsi i fumi che si formano dalla combustione
- nella via più esterna, tramite il terminale, convoglia l'aria che viene aspirata dall'apparecchio termico
- la parte di coibentazione di spessore 30 mm presente tra le due vie di flusso permette di mantenere i fumi di scarico ad una temperatura ottimale anche in caso di apparecchi termici che dichiarino temperature di uscita fumi molto basse (sotto i 90°C)
- migliora il rendimento della stufa con un conseguente importante risparmio energetico

Concentric insulated triple wall system in stainless steel.

The inner pipe and the external pipe form two flow paths:

- combustion fumes are expelled by the inner pipe
- in the outer pipe, the combustible air is conveyed from the cap to the generator
- the 30 mm thick insulation part between internal and external pipes allows to keep the exhaust fumes at a good temperature even in case of heating appliances with very low outlet temperatures (below 90°C)
- it improves stove efficiency with consequent important energy savings

Système concentrique isolé en acier inox triple paroi.

Le tuyau interne et le tuyau externe forment deux voies d'écoulement :

- les fumées de combustion sont expulsées par le tuyau intérieur
- dans le tuyau extérieur, l'air combustible est amené du chapeau au générateur
- la partie isolante de 30 mm d'épaisseur entre les tuyaux interne et externe permet de maintenir les fumées d'échappement à une bonne température même en cas d'appareils de chauffage avec des températures de sortie très basses (inférieures à 90°C)
- il améliore la performance du poêle avec d'importantes économies d'énergie

## FORXS - FORX2

FORXS e FORX2 sono delle fascette complete di ali di fissaggio e supporto, regolabili in inclinazione da 0° a 45°.

Queste fascette vincolano la canna fumaria che attraversa il solaio in condizione verticale. Sono leggere ma allo stesso tempo robuste grazie alla solidità della piegatura presente sulle ali. Sono poco ingombranti, adatte ad essere installate su tetti e solai.

FORXS and FORX2 are clamps with fixing and support wings, adjustable in inclination from 0° to 45°.

These clamps bind the chimney that crosses the roof in a vertical condition. They are light but at the same time robust thanks to the solidity of the wings bending. They are not very bulky, and they are apt to be installed on roofs and floors.

FORXS et FORX2 sont des brides avec des ailes de fixation et support, ajustables en inclination de 0° à 45°. Ces brides immobilisent la cheminée qui traverse le plancher en condition verticale. Elles sont légères mais au même temps robustes grâce à la solidité du pliage présent sur les ailes. Elles ne sont pas très encombrantes, aptes pour être installées sur les toits et les planchers.

# APOLLO

Sistema camino coassiale in doppia parete in acciaio inox 316L sp.0,4 mm coibentato aria.

La tubazione interna e la tubazione esterna formano due vie di flusso:

- nella via centrale vengono espulsi i fumi che si formano dalla combustione
- nella via più esterna, tramite il terminale, convoglia l'aria che viene aspirata dall'apparecchio termico.

Air insulated concentric double wall pipe in stainless steel 316L thickness 0.4 mm.

The inner pipe and the external pipe form two flow paths:

- combustion fumes are expelled by the inner pipe
- in the outer pipe, the combustible air is conveyed from the cap to the generator.

Système de cheminée concentrique à double paroi en acier inoxydable 316L épaisseur 0,4 mm isolé à l'air.

Le tuyau interne et le tuyau externe forment deux voies d'écoulement:

- les fumées de combustion sont expulsées par le tuyau intérieur
- dans le tuyau extérieur, l'air combustible est amené du chapeau au générateur.

Coppella con rivestimento in alluminio resistente fino a 600°C

Thermal insulation with aluminium coating resistant up to 600°C

Isolation thermique avec revêtement en aluminium résistant jusqu'à 600°C

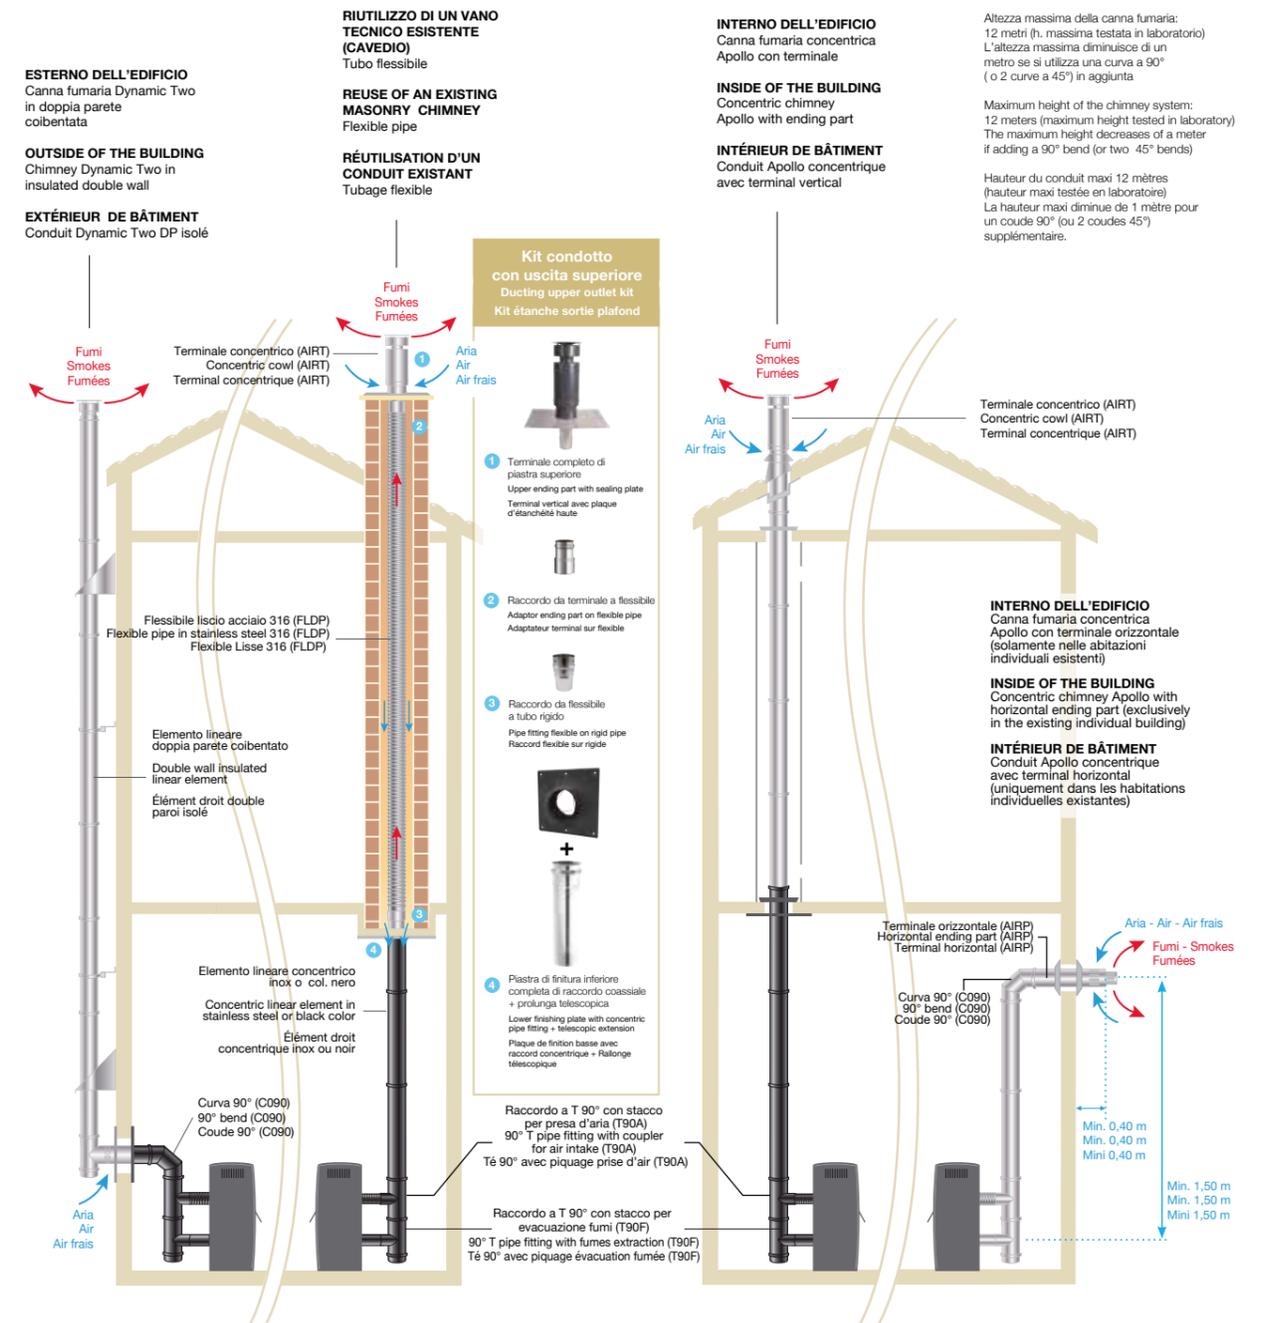

CODICE CODE - CODE	$\varnothing$	SP	h	
AK125COPA	125	100	350	1
AK150COPA	150	100	350	1

Coppelle in lana di roccia per canne fumarie densità 90kg/m<sup>3</sup> - Rock wool insulation for chimney systems density 90 kg/m<sup>3</sup> - Isolation de laine de roche pour conduits de cheminée densité 90 kg/m<sup>3</sup>

## INSTALLAZIONE TIPO - CIRCUITO DI COMBUSTIONE A TENUTA STAGNA

INSTALLATION TYPE - COMBUSTION CIRCUIT BY SEALED CHAMBER

INSTALLATION TYPE - CIRCUIT DE COMBUSTION ÉTANCHE

# VELA

Tubo flessibile in acciaio inox AISI 316L doppia parete coibentato. Spessore parete interna 0,12 mm.

Insulated double wall flexible pipes in stainless steel AISI 316L. Inner wall thickness 0.12 mm.

Tuyaux flexibles isolés à double paroi en acier inoxydable AISI 316L. Épaisseur de la paroi intérieure 0,12 mm.

### PLUS e CARATTERISTICHE TECNICHE:

- certificato G80 = 80 mm da parete sensibile
- migliora l'efficienza delle stufe a legna e a pellet che lavorano con basse temperature di uscita fumi
- è idoneo per l'intubamento o il risanamento di camini e asole tecniche esistenti o dismessi, irregolari e curvilinei
- è compatibile con le nostre linee Dynamic Two e Flex

### PLUS and TECHNICAL CHARACTERISTICS:

- G80 certificate = 80 mm from sensitive wall
- improves the efficiency of wood and pellet stoves that work with low smoke outlet temperatures
- it is suitable for ducting or renovating existing or disused technical chimneys of irregular or curvilinear shape
- is compatible with our Dynamic Two and Flex lines

### AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:

- certificat G80 = 80 mm du mur inflammable
- améliore la performance des poêles à bois et à granulés qui fonctionnent avec des températures de sortie de fumée basses
- il convient au conduit ou à la rénovation de cheminées techniques existantes ayant forme irrégulière et curviligne
- est compatible avec nos gammes Dynamic Two et Flex

# Schema di montaggio

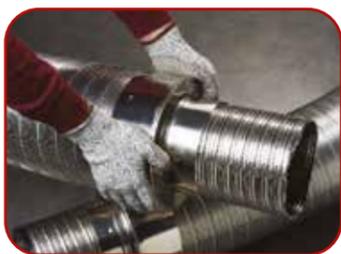

Assembly scheme  
Schéma de montage

Parte superiore del condotto  
Top conduit end  
Embout haut de conduit

Estremità inferiore del condotto  
Low conduit tip  
Embout bas de conduit

**Passaggio 1:** Svitare l'estremità superiore del condotto (1)  
**Passaggio 2:** Tagliare il tubo esterno, l'isolamento e il tubo interno (lasciarlo sporgere di 6 cm) con l'apposito attrezzo  
**Passaggio 3:** Riavvitare il connettore del condotto superiore sul condotto interno prima poi sull'estremità esterna (1)

**Step 1:** Unscrew the top end of the duct (1)  
**Step 2:** Cut the outer pipe, insulation and inner pipe (leave it protruding by 6 cm) with the appropriate tool  
**Step 3:** Screw the upper duct connector back onto the inner duct first then on the outer end (1)

**Etape 1:** Dévisser l'embout haut de conduit (1)  
**Etape 2:** Couper le flexible extérieur, l'isolant et le flexible intérieur (le laisser dépasser de 6 cm) avec l'outil adéquat  
**Etape 3:** Revisser l'embout haut de conduit sur le conduit intérieur d'abord puis sur l'embout extérieur (1)

**Passaggio 1:** Svitare uno dopo l'altro i 2 elementi della punta (2A e 2B)  
**Passaggio 2:** Tagliare il tubo esterno, l'isolamento e il tubo interno (lasciarlo superare i 6 cm) con l'apposito attrezzo  
**Passaggio 3:** Avvitare l'estremità 2A sul tubo interno con le alette sul lato del condotto  
**Passaggio 4:** Avvitare l'estremità 2B sul tubo interno e appoggiarlo la punta 2A

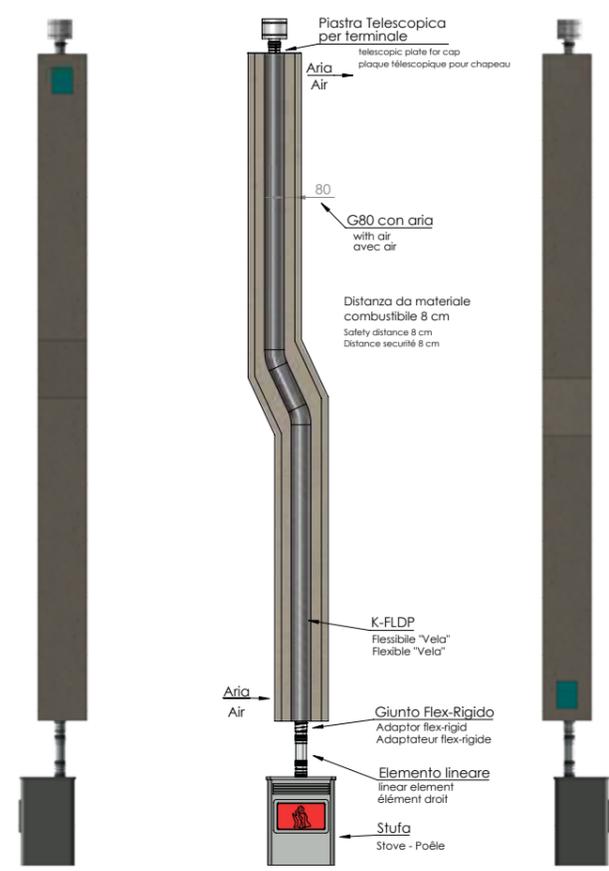

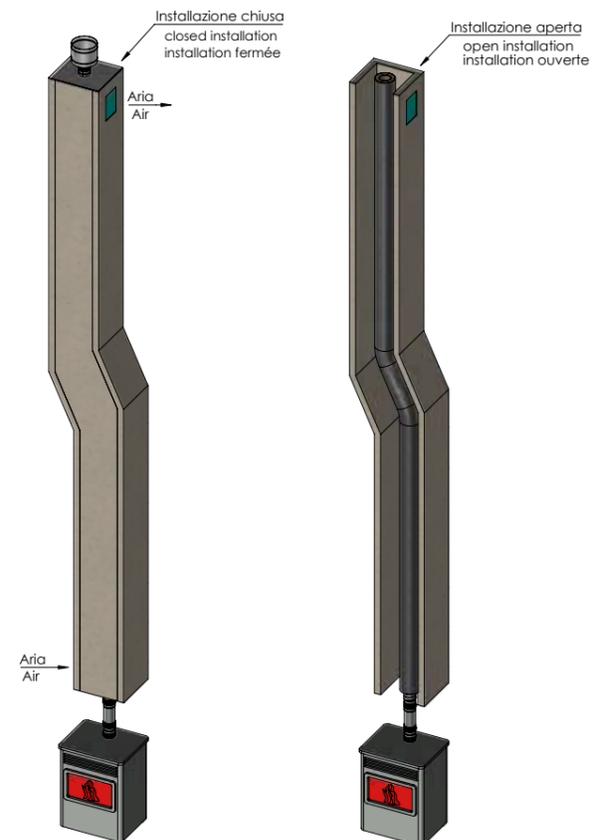

**Step 1:** Unscrew the 2 tip elements (2A and 2B) one after the other  
**Step 2:** Cut the outer pipe, insulation and inner pipe (leave it protruding by 6 cm) with the appropriate tool  
**Step 3:** Screw the 2A end onto the inner tube with the lugs on the duct side  
**Step 4:** Screw the 2B end onto the inner tube and lay it down tip 2A

**Etape 1:** Dévisser les 2 éléments de l'embout l'un après l'autre (2A et 2B)  
**Etape 2:** Couper le flexible extérieur, l'isolant et le flexible intérieur (le laisser dépasser de 6 cm) avec l'outil adéquat  
**Etape 3:** Revisser l'embout haut de conduit sur le conduit intérieur avec les ailes sur le côté du conduit (2A)  
**Etape 4:** Visser l'embout 2B sur le flexible intérieur, et le faire reposer sur l'embout 2A

# FLEX

Tubo flessibile doppia parete in acciaio inox AISI 316L.

**PLUS e CARATTERISTICHE TECNICHE:**

- spessore 0,12 mm
- Interno liscio ed esterno corrugato
- è idoneo per l'intubamento o il risanamento di camini e asole tecniche esistenti o dismessi, irregolari e curvilinei
- può essere usato anche come condotto d'aria per ventilazione e condizionamento

Double wall flexible pipe in AISI 316L stainless steel.

**PLUS and TECHNICAL CHARACTERISTICS:**

- thickness 0.12 mm
- smooth inside and corrugated outside
- it is suitable for ducting or renovating existing or disused technical chimneys of irregular or curvilinear shape
- it can also be used as duct for air ventilation and conditioning.

Tuyau flexible in AISI 316L double paroi.

**AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:**

- épaisseur 0,12 mm
- intérieur lisse et extérieur ondulé
- il convient au conduit ou à la rénovation de cheminées techniques existantes de forme irrégulière ou curviligne
- il peut également être utilisé comme conduit pour la ventilation et le conditionnement de l'air.

# Plasti FLEX

Condotti flessibili in polipropilene per intubamento.

Flexible polypropylene pipes.

Conduits flexibles en polypropylène pour canalisation.

### PLUS e CARATTERISTICHE TECNICHE:

- spessore minimo di 2 mm
- temperatura di esercizio fino a 120°C
- facile innesto
- tenuta alla pressione in H1 ( $\leq 5.000$  Pa)
- possibilità di utilizzo di giunti per raccordare il tubo flessibile con il tubo rigido, evitando così gli scarti
- disponibile in colore nero su richiesta

### PLUS and TECHNICAL CHARACTERISTICS:

- minimum thickness of 2 mm
- working temperature of up to 120°C
- easy to install
- pressure tightness in H1 ( $\leq 5.000$  Pa)
- possibility of using couplings to fit the flexible pipe to the rigid pipe, in order to avoid wastes
- available in black finish on request

### AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:

- épaisseur minimale de 2 mm
- température de fonctionnement jusqu'à 120°C
- couplage facile
- étanchéité à la pression en H1 ( $\leq 5.000$  Pa)
- possibilité d'utiliser les accouplements pour raccorder le tuyau flexible au tuyau rigide, en évitant les déchets
- disponible en finition noir sur demande

# Plasti ONE

Condotti monoparete in polipropilene per uso interno.

Single-wall polypropylene pipes for indoor use.

Conduits en polypropylène à simple paroi pour usage interne.

**PLUS e CARATTERISTICHE TECNICHE:**

- compatibili con i principali produttori di caldaie
- spessore minimo di 2 mm
- temperatura di esercizio fino a 120°C
- tenuta alla pressione in H1 ( $\leq 5.000$  pa)
- possibilità di innesto con centraggio per cavedio

**PLUS and TECHNICAL CHARACTERISTICS:**

- compatible with the main boilers on the market
- minimum thickness of 2 mm
- working temperature up to 120°C
- pressure tightness in H1 ( $\leq 5.000$  pa)
- possibility to install with centring for existing chimneys

**AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:**

- compatibles avec les principaux fabricants de chaudières
- épaisseur minimale de 2 mm
- température de fonctionnement jusqu'à 120°C
- étanchéité à la pression en H1 ( $\leq 5.000$  pa)
- possibilité d'installation avec centrage pour les cheminées existantes

# Plasti TWO

Condotti in doppia parete concentrici per uso interno.

Double-wall pipes for indoor use.

Conduits concentriques à double paroi pour usage interne.

### PLUS e CARATTERISTICHE TECNICHE:

- parete interna in polipropilene spessore minimo 2 mm
- parete esterna in acciaio zincato e verniciato di spessore 0,5 mm
- compatibili con i principali produttori di caldaie
- temperatura di esercizio fino a 120°C
- la gamma comprende terminali performanti in polipropilene o nylon di colore nero, studiati con filtro anti UV, per garantire la durata e il funzionamento anche in condizioni metereologiche avverse

### PLUS and TECHNICAL CHARACTERISTICS:

- internal wall in polypropylene minimum thickness 2 mm
- external wall in galvanized and painted steel thickness 0,5 mm
- compatible with the main boilers on the market
- working temperature up to 120°C
- the range includes high-performance cowls made of black polypropylene, designed with anti-UV filter to ensure durability and efficiency, even in adverse weather conditions

### AVANTAGES et CARACTÉRISTIQUES TECHNIQUES:

- paroi intérieure en polypropylène épaisseur minimale 2 mm
- paroi extérieure en acier galvanisé et peint épaisseur 0,5 mm
- compatibles avec les principaux fabricants de chaudières
- température de fonctionnement jusqu'à 120°C
- la gamme comprend des terminaux hautes performances en polypropylène ou nylon de couleur noir, conçus avec un filtre anti-UV, pour garantir la durabilité et le fonctionnement même dans des conditions météorologiques défavorables

# NOI PER VOI

WE FOR YOU | NOUS POUR VOUS

**#01** **Insieme siamo migliori**  
Together we are better  
Ensemble, nous sommes meilleurs

**#02** **Promuoviamo l'empowerment come nuovo modello di management**  
We promote empowerment as a new management model  
Nous promovons l'autonomisation en tant que nouveau modèle de gestion

**#03** **Siamo orgogliosi del nostro legame con il territorio**  
We are proud of our connection with the territory  
Nous sommes fiers de notre lien avec le territoire

**#04** **Prendiamo decisioni che rispondono ai bisogni dei nostri clienti**  
We make decisions that meet the needs of our customers  
Nous prenons des décisions qui répondent aux besoins de nos clients

**#05** **Poniamo domande giuste per trovare soluzioni giuste**  
We ask the right questions to find the right solutions  
Nous posons les bonnes questions pour trouver les bonnes solutions

**#06** **Preferiamo davvero risolvere i problemi e non ci accontentiamo**  
We really prefer to solve problems and not be satisfied  
Nous préférons vraiment résoudre les problèmes et ne pas être satisfaits

**#07** **Offriamo servizi, non solo prodotti**  
We offer services, not just products  
Nous offrons des services, pas seulement des produits

**#08** **Non scendiamo a compromessi sull'eccellenza**  
We do not compromise on excellence  
Nous ne faisons aucun compromis sur l'excellence

**#09** **Siamo sempre un passo avanti rispetto alle normative**  
We are always one step ahead of regulations  
Nous avons toujours une longueur d'avance sur les réglementations

**#10** **Stiamo costruendo il nostro secondo secolo di innovazione**  
We are building our second century of innovation  
Nous construisons notre deuxième siècle d'innovation

**... E per finire, diciamo ciò che facciamo e facciamo ciò che diciamo.**

... And finally, we say what we do and do what we say.

... Enfin, nous disons ce que nous faisons et faisons ce que nous disons.
