FLEX

Tubo flessibile doppia parete in acciaio inox AISI 316L.

PLUS e CARATTERISTICHE TECNICHE:

- spessore 0,12 mm
- Interno liscio ed esterno corrugato
- è idoneo per l'intubamento o il risanamento di camini e asole tecniche esistenti o dismessi, irregolari e curvilinei
- può essere usato anche come condotto d'aria per ventilazione e condizionamento

Double wall flexible pipe in AISI 316L stainless steel.

PLUS and TECHNICAL CHARACTERISTICS:

- thickness 0.12 mm
- smooth inside and corrugated outside
- it is suitable for ducting or renovating existing or disused technical chimneys of irregular or curvilinear shape
- it can also be used as duct for air ventilation and conditioning.

Tuyau flexible in AISI 316L double paroi.

AVANTAGES ET CARACTÉRISTIQUES TECHNIQUES :

- épaisseur 0,12 mm
- intérieur lisse et extérieur ondulé
- il convient au conduit ou à la rénovation de cheminées techniques existantes de forme irrégulière ou curviligne
- il peut également être utilisé comme conduit pour la ventilation et le conditionnement de l'air.

Tubo flexible de doble pared de acero inoxidable AISI 316L.

VENTAJAS Y CARACTERÍSTICAS TÉCNICAS:

- 0,12 mm de espesor
- interior liso y exterior corrugado
- es adecuado para la canalización o renovación de chimeneas y conductos de humos existentes o fuera de servicio, irregulares y curvos
- también puede utilizarse como conducto de aire para ventilación y aire acondicionado
